

Duration & Latency Recording Form

Client Name: _____

Date: _____

Observer: _____

Start Time: _____

Setting / Activity: _____

End Time: _____

Duration = How long the behavior lasts.

Latency = How quickly the behavior occurs after the stimulus.

#	Target Behavior	SD / Trigger / Instruction	DURATION			LATENCY			Notes
			Start Time	End Time	Total Duration (hh:mm:ss / sec)	SD Given	Behavior Start Time	Latency (hh:mm:ss / sec)	
①	_____	_____	__:__:__	__:__:__	_____	__:__:__	__:__:__	_____	_____ _____ _____
②	_____	_____	__:__:__	__:__:__	_____	__:__:__	__:__:__	_____	_____ _____ _____
③	_____	_____	__:__:__	__:__:__	_____	__:__:__	__:__:__	_____	_____ _____ _____
④	_____	_____	__:__:__	__:__:__	_____	__:__:__	__:__:__	_____	_____ _____ _____
⑤	_____	_____	__:__:__	__:__:__	_____	__:__:__	__:__:__	_____	_____ _____ _____

DURATION (How long the behavior lasts)

1. Start timer when the behavior begins.
2. Stop timer when the behavior ends.
3. Record total duration.

LATENCY (How quickly the behavior occurs)

1. Start timer when the SD / instruction is given.
2. Stop timer when the behavior begins.
3. Record latency.

Session Summary (Optional)

Total Duration (All Behaviors): _____

Average Latency (All Behaviors): _____

Consistent data helps us understand and support progress.
